

Product Owner for Intelligence Engineering

Join us as we transform banking through data at Danske Bank. As Product Owner for Data Products, ML Enablement and MLOps, you will shape the future of personal banking by creating data assets that power personalised customer experiences. This is your opportunity to lead meaningful change in financial services.

You will join the Customer Engagement Individuals Tribe as a Product Owner with responsibility for the work delivered by, and together with, Engineers, Business Functional Specialists, Architects and more. In our department you will gain approximately 160 colleagues where you will lead one of the squads who will help enable Danske Bank to get ready for the next generation of banking services.

What you will be doing

You will lead a diverse team of data engineers, architects, and specialists across the Customer Engagement Individuals tribe, working on the group-wide AWS Databricks platform. Your work directly enables proactive, personalised banking services that build lasting customer relationships.

- Lead development of data assets and products for commercial use cases
- Collaborate with data platform teams to deploy advanced analytics using MLOps practices
- Manage stakeholders across the bank working with data development
- Guide conversion of PC platform to the group-wide data platform
- Align data development with regulatory, governance and security frameworks
- Mentor colleagues and foster learning in new technologies
- Bridge legacy systems to modern data platforms

About you

- 3+ years of experience in Product Owner roles relevant to data products
- 5+ years of experience in financial services across different domains
- Proven background as data engineer or leading data/ML engineering teams
- Familiarity with data platform concepts like delta lakes and event-driven architectures
- Understanding of technical and data-architectural trade-offs
- Skilled in agile project management and associated activities
- Strategic mindset with ability to inspire team followership
- Strong communication and stakeholder management abilities
- Fluent in written and spoken English

Experience with real-time processing, data governance, or change management would be valuable additions to your profile.

What we offer you

You will join approximately 160 colleagues in a diverse, international environment spanning the Nordics, Lithuania, and India. We support your growth through mentorship opportunities and exposure to cutting-edge banking technology. Our hybrid work model includes 3-4 days per week in the office to foster collaboration and knowledge sharing.

Are you ready for the next step?

We would love to hear from you if you are ready to shape the future of data-enabled banking. Please reach out to Mikkel Winther at mikkelw@danskebank.dk with any questions about this role.

The application deadline is the 15*th* of October 2026. We look forward to hearing from you!
