IT Lead for Digital Core

As IT Lead for Digital Core, you will co-lead a strategically important technology area at the heart of Danske Bank's core banking platform together with the Tribe Lead. You will help set technical direction, drive execution, and support modernisation while safeguarding stability, resilience, and compliance.

About Digital Core

Digital Core supports the modernisation of customer and account capabilities while underpinning essential financial services in the Nordics.

The team includes around 180 colleagues across Denmark, Lithuania, and India. You will work closely with the Tribe Lead, architects, chapter leads, product leaders, and business stakeholders to drive progress through collaboration, clarity, and strong execution.

Location can both be in Aarhus or Copenhagen.

Key Responsibilities

- Set technical direction for Digital Core with the Tribe Architect, Tribe Lead, and senior stakeholders.
- Co-lead the tribe to align business priorities, technology strategy, and delivery.
- Lead and support technical leaders to improve engineering quality and team development.
- Drive modernisation through simplification, scalable architecture, and strong engineering practices.

- Provide transparency on progress, risks, dependencies, and technical health.

What Will Help You thrive in the Role

We know strong candidates may not meet every single point below. If this role excites you and your experience is relevant, we encourage you to apply.

- Experience leading in a complex technology environment, ideally in banking or another regulated setting.
- Experience leading senior technical profiles, or readiness to grow into a broader leadership role.
- Strong understanding of modern engineering practices and architecture, including cloud, APIs, microservices, automation, and resilient systems.
- Ability to turn strategic ambition into priorities, roadmaps, and delivery outcomes.
- A collaborative leadership style that builds trust and works well across diverse stakeholders.

Why Join Us?

This is an opportunity to take on a key leadership role in one of Danske Bank's most important technology areas and help shape the bank's core modernisation journey.

You will join a leadership team with a strong commitment to simplification, modernisation, and stronger engineering foundations. We value collaboration, different perspectives, and an environment where people can grow and contribute.

At Danske Bank, we believe diverse perspectives improve our teams and decisions. We welcome candidates from different backgrounds and encourage you to apply even if you do not meet every requirement. If you need adjustments during the recruitment process, please let us know.

Please apply as soon as possible, as we review applications on an ongoing basis. For more information, please contact Casper Lund Thomsen at calu@danskebank.dk.

About Us

Danske Bank is a Nordic bank with bridges to the world around us. For 150 years, we have supported people and businesses in releasing their potential. A career with us is an opportunity to join a community of 22,000 colleagues in a culture where we are committed to Teaming Up, Owning It and Being Open. Together, we are on a journey to transform Danske Bank into a better bank. For our customers, our employees and the societies around us.
