

Software Engineering Chapter Lead for Markets Business Technology

Join our Markets Business Technology tribe as **Software Engineering Chapter Lead** where you will modernize solutions in Risk and XVA domain. You will lead a chapter of experienced software engineers while staying technically involved in day-to-day development work. This dual role offers the opportunity to shape both technology and careers in a collaborative environment.

What you will be doing:

You will be part of either the Market Risk Modelling or CCR & XVA Modelling team, working closely with product owners, architects, and engineers across locations to deliver secure and scalable solutions. Your technology landscape includes .NET/C#, OpenShift, AWS, MS SQL Server, and MySQL.

Your main responsibilities will be:

- Lead and grow a chapter of software engineers through coaching and career development.
- Build a collaborative engineering culture with product owners and architects.
- Champion engineering approaches through mentoring, code reviews, and knowledge sharing.
- Work with product owners and architects to deliver maintainable solutions.
- Take ownership across the full product lifecycle from development to deployment.
- Contribute to modernization initiatives and AI-powered tools.

About you:

- 5+ years of software engineering experience, ideally in cloud application development.
- 1+ years of people leadership experience.
- Strong product mindset with focus on quality, automation, and security.
- Confidence to take technical ownership and explain trade-offs to stakeholders.
- Collaborative, servant leadership mindset with genuine interest in coaching engineers.
- Curiosity and willingness to improve both current and legacy solutions.
- Experience working in agile, cross-functional, and internationally distributed teams.

We offer:

The workplace can be in Vilnius, Lithuania or Copenhagen, Denmark. If you are hired in Lithuania, monthly salary range would be **from 5760 EUR to 8640 EUR gross** (based on your competencies relevant for the job).

Additionally, each Danske Bank employee receives employee benefits package (this one is only valid for Lithuania) which includes:

- **Growth opportunities:** professional & supportive team, e-learning, numerous development programs; (incl. professional certificates); 100+ professions for internal mobility opportunities.
- **Health & Well-being:** a diverse, inclusive, work & life balance work environment; additional health insurance; mental well-being practices; partial psychologist counselling compensation; silence and sleep zones at the office; game rooms.
- **Hybrid working conditions:** Work from home up to two days a week; home office budget (after the probation period); modern Danske Campus workplace developed with anthropologist for the best employee experience.
- **Additional days of leave:** for rest, health, volunteering, exams in higher education institutions, and other important activities. Moreover, for seniority with Danske Bank.
- **Monetary compensation package:** accidents & critical diseases insurance; financial support in case of unfortunate events, travel insurance; 3rd Pillar Pension Fund contribution.

See all the benefits **HERE**.

Your job function (position) in the job contract will be Software Engineering.

If you're interested in this role and joining my team, feel free to contact me **Zigmantas Gaidamavicius | LinkedIn** and I will answer your questions! The application deadline is 22 October 2026.
