

## Product Manager, CTO Area

*Do you want to shape how the world's largest dedicated fund manager within greenfield renewable energy uses AI to deploy capital? If so, CIP Fund Solutions (CIP FS) is looking for a Product Manager to join our Digital & AI team in Copenhagen, Denmark.*

### Team

As Product Manager, you will join the Digital & AI team in CIP Fund Solutions, reporting to the Investment Lifecycle Lead. You will be part of a new delivery unit, developing and rolling out digital and AI solutions that will bring efficiency to CIP's investment teams.

### Role

Behind every investment decision at CIP sit data rooms, contracts, financial models and investment committee materials. As Product Manager, you will find where AI saves the investment teams the most time or improves their decisions and turn that into products they use every day. You will own the AI product roadmap for the investment lifecycle, from identifying use cases through delivery, adoption and measured impact.

### Responsibilities will consist of but are not limited to:

- Embed with investment teams to map workflows and quantify where AI adds value.
- Own and prioritize the AI product roadmap for the investment lifecycle.
- Turn business problems into requirements, success metrics and acceptance criteria for engineering.
- Prototype and demo concepts with users before committing engineering capacity.
- Drive adoption and report impact in time saved, cycle time and usage.
- Assess external AI vendors against internal build options, and make sure solutions meet CIP's security, data protection and responsible AI requirements.

**You**

You have a master's degree in Engineering, Computer Science, Finance, Economics or a related field, and bring 5-8 years of experience in product management, management consulting, technology delivery or an investment role.

You have a track record of taking data or AI products from problem definition to adoption by business users, and working knowledge of LLMs, AI agents and retrieval-based solutions. You are technically fluent (basic Python or SQL, APIs, AI prototyping tools) and can build demos and work credibly with engineers. Experience from infrastructure, private equity, project finance or energy is considered beneficial.

**We look for the following in a candidate:**

- Solid stakeholder management and the credibility to challenge senior investment professionals.
- Clear, concise communication, with the ability to explain complex topics simply.
- Structured and commercially minded, with a focus on where AI creates the most value.
- Ownership of ambiguous problems and the drive to see solutions through to adoption.
- Highly proficient written and verbal English. Danish is not a requirement.

**The process**

Please apply online as soon as possible as applications will be processed on an ongoing basis. For questions related to the role, please reach out to our Talent Acquisition team at [recruitment@cipfs.com](mailto:recruitment@cipfs.com). We do not include CV's and Cover Letters sent by email.

As we continue to improve our candidate experience, diversity and avoid unconscious bias, please avoid having a photo in your CV. We commit to an inclusive recruitment process and equality for all applicants.

Please be aware that we will not accept speculative CV submissions for any of our roles from recruitment agencies, and any unsolicited candidate submissions will be exempt from any payment expectations and ownership.

---

**CIP Fund Solutions' commitment to diversity and inclusion**

CIP Fund Solutions is committed to securing a diverse and inclusive work environment where everyone feels respected and heard.

A diverse workforce allows CIP Fund Solutions to achieve results through different approaches and solutions to task execution and problem solving. We want all our employees to have equal opportunities for personal growth and career opportunities regardless of age, gender, sexual orientation, disability, religion, nationality, or ethnicity.

**CIP Fund Solutions**

CIP FS' purpose is to enable CIP's ambition to scale rapidly over the coming strategy-period - supporting our colleagues with professional and efficient financial, legal, tax and business operations through the cycle from fund formation and

capital raising, to deploying investments into construction of large-scale greenfield renewable energy assets, as well as M&A.

For more information, please visit CIP Fund Solutions.
