

Executive Advisor to Chief AI Officer (Maternity Cover)

Are you our next GenAI Executive Advisor?

Danske Bank has, over the past years, laid a strong foundation for Generative AI (GenAI). We are now enhancing our goals and driving highly transformative initiatives that will accelerate value creation for our customers, colleagues, and shareholders.

To support this journey, we are looking for an Executive advisor to the Chief AI Officer (CAIO). In this role, you will work closely with the CAIO and the newly established GenAI Business Management & Implementation (BMI) team. This role involves perfecting the ability to navigate change in a dynamic, task-agnostic environment, managing strategic tasks, operational follow-ups, and ad hoc problem-solving to ensure the CAIO has optimal conditions for advancing the GenAI agenda. You will work across all areas of responsibility, providing structure, clarity, and strategic support where it matters most.

Key Responsibilities

Executive Support & Coordination:

- Jump into diverse tasks - whether preparing executive materials, coordinating projects, or solving urgent challenges.
- Operate seamlessly across the full spectrum of the CAIO's priorities, from day-to-day operational execution to high-impact strategic initiatives, always with a focus on delivering outcomes.
- Bring the same level of excellence to both administrative and strategic work, recognising that impact comes from anticipating needs and enabling the CAIO to operate at his best.
- Act as a proactive problem-solver, anticipating needs and removing blockers before they escalate.

Strategic Execution:

- Collaborate with the GenAI Tribe, Tech colleagues, and senior stakeholders to keep priorities moving.
- Monitor KPIs and progress against strategic objectives.
- Prepare high-quality presentations, and reports for executive audiences.
- Coordinate cross-functional follow-ups & mini-projects, ensuring decisions translate into clear actions and deliverables.

Qualifications & Skills

- 3-5 years of experience in management consulting, business management, or strategy execution, ideally within financial services or technology.
- High adaptability and comfort with ambiguity - able to pivot quickly between priorities.
- Strong organizational, coordination skills, and attention to detail - with the ability to manage multiple tasks simultaneously.
- Strong communication and stakeholder management skills, including experience engaging senior leaders
- Structured approach with the ability to synthesize complex information into clear insights
- Proficiency in creating visually compelling presentations and reports for executive audiences.

Why Join Us?

This is a unique opportunity to work closely with Danske Bank’s Chief AI Officer (CAIO) and gain first-hand exposure to one of the most strategic agendas in the bank. You will operate at the center of our GenAI transformation, engaging with senior leaders and shaping initiatives that shape the future of banking.

Apply

Have we caught your attention? If you are inspired to drive change help shape the future in the GenAI space, we would like to hear from you. For any questions, please reach out to hiring manager, Farid Noroozian at farn@danskebank.dk.

Please note that this is a maternity cover for a team member on leave and the role offers a temporary contract.
