

Senior PO & Digital Business Developer

Senior PO & Digital Business Developer

At If, we help people feel confident today so they can shape their tomorrow. In Mobility, we focus on car insurance—and on making life easier when something happens on the road. We're now looking for an experienced Senior PO and Digital Business Developer to join us. Could that be you?

What are we looking for?

You have solid experience as a Product Owner, ideally from a larger organization with complex dependencies. You're comfortable balancing customer needs, business goals, technology, and stakeholder expectations—and you know how to create clarity when there are many perspectives around the table.

You're happy to share your views, but equally good at listening. You enjoy helping teams find smarter ways to solve problems, including exploring how AI can improve products and ways of working. Experience of AI-assisted development, financial services, or car insurance is a plus, but not a requirement. Understanding Swedish would be an advantage.

These are some personal traits we think you might recognize in yourself:

- You care about the wellbeing of others and yourself
- You have a strong moral compass
- You like working with others but can also take on tasks yourself
- You like to solve problems and complexity gets you excited
- You like to grow your network and use it to solve problems

- You get stuff done.

About the role

You'll join the Mobility Tribe as a digital Senior Product Owner, leading the work of one of our agile squads. You'll explore customer and business needs, set priorities, align stakeholders, and help the team turn ideas into valuable solutions.

You'll also be an active member of our Product Owner community, where you'll share your experience, challenge established ways of thinking, and help us continue developing how we work with product management. As a senior colleague, you'll support and coach less-experienced Product Owners and take the lead on broader strategic initiatives.

We offer

- An including work environment where everyone is welcome
- Career and development opportunities in the biggest insurance company in the Nordics
- Social activities, as well as highly skilled professional environment
- Possibility of hybrid workplace
- Health promoting workplace with e.g., wellness allowance and various sports activities
- Great insurance benefits

About the team

Most of your day-to-day work will happen within the Tribe. Partly with other POs, partly with stakeholders and partly with your agile team. When it comes to reporting lines, you will be part of a group of Digital Managers reporting to the Mobility Tribe Business Owner. We all work to make car insurance a little bit more hassle-free and smooth.

Additional facts and the recruitment process

Application deadline: Screening and interviewing will start immediately. However, application deadline is November 8, 2026.
