

Investment Director – Frontier Technologies

Help build the next generation of technology leaders. EIFO backs ambitious Danish companies with the potential to become global leaders and strengthen Denmark's competitiveness. As AI, advanced computing and quantum technologies reshape industries, we are strengthening our Frontier Technologies team. We are looking for an experienced Investment Director who combines solid investment judgment, deep technology insight and a passion for helping founders build globally competitive businesses.

About the role

You will identify, lead and develop investments across deep tech, AI, next-generation computing and quantum technologies, including the infrastructure, hardware and software enabling future technological breakthroughs.

From sourcing and investment execution to active portfolio development, you will work closely with founders, co-investors and industry partners to turn technological potential into commercial success.

Reporting to Sara Sande, Partner & Head of Frontier Technologies, you will collaborate with colleagues across EIFO and the wider innovation ecosystem.

What you'll do

1) Invest in promising technologies

- Source and lead investments from initial assessment through due diligence, negotiation and closing.
- Develop investment theses and assess technology, markets, teams and business models.
- Structure investments alongside founders and co-investors.

2) Help build and scale companies

- Manage a portfolio of technology companies.
- Support founders on strategy, financing, governance and international growth.
- Contribute through board work, strategic sparring and follow-on investments.

3) Strengthen our team and ecosystem

- Help shape EIFO's Frontier Technologies investment strategy.
- Build relationships across the international investment community, research and industry.
- Share knowledge, support teammates, and help build a collaborative team.

What you'll bring

You combine investment experience, commercial judgment and a deep understanding of technology.

We imagine you bring several of the following:

- Experience from venture capital, corporate venture, institutional investment or a similar environment.
- A track record of sourcing, evaluating and leading technology investments.
- Experience developing portfolio companies and working closely with founders, including board experience.
- Extensive experience in deep tech, AI, next-generation computing and/or quantum technologies.
- The ability to translate complex technology into clear commercial and investment perspectives.

You are intellectually curious, methodical and comfortable making decisions in uncertain environments.

You own your work, ask questions constructively and value collaboration. You enjoy sharing knowledge and helping colleagues succeed.

We value different career paths and perspectives, alongside the skills and judgment needed to make sound investment decisions.

Why EIFO?

EIFO is Denmark's sovereign investment fund, providing capital and risk-sharing solutions to Danish businesses, from startups to established companies expanding internationally.

At EIFO, you can invest in technologies that matter, work alongside motivated founders and help improve Denmark's future competitiveness. You will combine investment responsibility with the opportunity to build companies and create lasting economic and societal value.

Are you our next colleague?

EIFO is partnering with Odgers on this recruitment. Please apply by email to Kristian Klint, Engagement Manager, at Odgers at kristian.klint@odgers.com, including your CV and application, as soon as possible and no later than **13 November 2026**.

As part of our commitment to inclusive recruitment, we kindly ask you not to include a photo, age or marital status in your application materials.

The recruitment process will include initial interviews with Odgers, followed by interviews with EIFO. Assessments are part of the process. References will be obtained with your consent, and you will be required to provide a criminal record certificate upon employment.

Desired start date is as soon as possible.

EIFO encourages candidates of all backgrounds to apply. Let's build the future together.

About Denmark's Export and Investment Fund

EIFO is Denmark's sovereign investment fund. We provide patient capital to startups, scaleups and growth companies while supporting Denmark's long-term competitiveness and innovation capacity.

Few investment platforms offer the combination of impact, access and long-term perspective that EIFO does. As Denmark's sovereign investment fund, we are uniquely positioned to connect research, entrepreneurship, industry and capital. This creates a rare opportunity to identify and support breakthrough technologies before they become global companies.

At EIFO, you will not only invest in companies - you will help shape the technologies, industries and capabilities that are critical to Europe's future competitiveness, resilience and prosperity.

The Frontier Technologies Team is a part of the EIFO Investment Team.
