

Product Owner

We are seeking an experienced and highly hands-on Product Owner who will own the vision and backlog for AI-powered solutions that serve our clients and advisors, from intelligent advisor assistants to personalized insights and smarter portfolio workflows.

You will work at the intersection of business transformation and advanced AI engineering – translating business needs into robust, well-governed agentic applications that can be safely deployed in a regulated banking environment.

About our team

The AWM Chief Operating Office (COO) drives operational excellence, supports business transformation, and fosters innovation across Asset & Wealth Management. We focus on improving processes, leveraging technology, and ensuring strong governance and compliance – enabling sustainable growth and superior client experiences. The COO team collaborates across business, technology, and control functions to identify opportunities and deliver measurable impact.

The AWM AI team in AWM COO to accelerates delivery and scale of AI capabilities across AWM, with a strong focus on Private Banking and selected cross-area dependencies. We build common AI architecture and reusable patterns, support a disciplined governance model, and partner closely with business units, engineering teams, and control functions to turn an active AI pipeline into measurable outcomes.

Collaboration. Ownership. Passion. Courage. These are the values that guide us in how we work and how we make decisions – and that we imagine you share with us.

Main responsibilities in this role:

- Define the product vision, strategy, and roadmap for AI use cases in private banking

- Identify and prioritize high-value use cases (e.g. GenAI advisor copilots, meeting summaries, next-best-action, document intelligence, client reporting)
- Own the backlog and translate business needs into user stories, acceptance criteria, and measurable outcomes
- Partner with data scientists, ML engineers, designers, and developers in agile teams
- Work with relationship managers, investment advisors, compliance, risk, and legal to make sure solutions are safe, explainable, and compliant
- Define success metrics for AI products: adoption, advisor time saved, client satisfaction, accuracy, and model quality
- Oversee pilots, testing, and responsible rollout, including human-in-the-loop controls and monitoring
- Keep up with AI and market developments and bring them into the roadmap

Who you are

This is the right role for you if: (State the most important behaviors and personal qualities you would like to see in a candidate. In this section you are welcome to indicate, e.g. soft skills, professional interests, aspirations, preferred areas of expertise, etc.)

This is the right role for you if you:

- Are a curious, innovative team player with a can-do attitude, always looking for ways on how we can unlock the next level for our customers.

Your background and skills include:

- 5+ years as Product Owner or Product Manager, ideally in banking, wealth management, or fintech
- Experience delivering data or AI/ML products, or strong hands-on exposure to GenAI and LLM-based solutions
- Solid understanding of private banking, portfolio management, or investment products
- Knowledge of financial regulation and AI governance (e.g. MiFID II, KYC/AML, GDPR, EU AI Act)
- Strong grasp of data quality, model risk, bias, and explainability
- Hands-on experience with Scrum or other agile methods
- Excellent stakeholder management and the ability to explain AI to non-technical audiences
- Degree in business, finance, IT, data science, or a related field (or equivalent experience)
- Fluent English; additional languages are a plus

If this sounds like you, get in touch!
