

EPC Procurement Lead, Advanced Bioenergy Fund

*Do you want to join a global leader in renewable energy infrastructure? If so, CIP Terra Technologies Advanced Bioenergy Fund is currently looking for a*n EPC Procurement Lead *to join our team in Copenhagen, Denmark.*

Team

The EPC Procurement Lead will become part of a small and experienced team of professionals contributing to the delivery of large-scale international biogas projects. Our goal is to assemble a motivated, diverse, and skilled team that works to make a meaningful, positive difference for the planet. This position will directly report to the Head of EPC Procurement and will be based in Copenhagen, with frequent travel required in Europe.

Role

As our EPC Procurement Lead, you act as the Project Legal Counsel and provide end-to-end legal support for large scale biogas projects, with an emphasis on project development, construction, transactions, and contract management. The role requires direct practical experience leading complex EPC contracts, negotiations, and claims management within an international project setting.

Responsibilities will consist of but are not limited to:

- Develop and implement CAPEX procurement strategies aligned with project development schedules and portfolio priorities.
- Drafting, reviewing, negotiating, and administering complex project documentation, including EPC contracts, supply agreements, service agreements, and related side agreements.

- Act as procurement lead for assigned projects, coordinating cross-functional stakeholders, managing internal approval stage gate process
- Oversee commercial negotiations with EPC contractors and key suppliers, including pricing, delivery timelines, warranties, and performance guarantees
- Coordinate with Engineering, insurance and ESG teams on risk allocation, LDs, technical guarantees, and contract interfaces
- Managing contract negotiations with a pragmatic, risk-based and commercially oriented approach.
- Advising internal stakeholders on contractual structures, risk allocation, and mitigation strategies.
- Ongoing contract management, interpretation, and enforcement throughout the project lifecycle.
- Legal support for M&A transactions, joint ventures, acquisitions, disposals, and portfolio transactions in the biogas sector.

You

The ideal candidate is a fully qualified lawyer with 10+ years of post-qualification experience, gained in-house or in private practice, with a strong business acumen. You have demonstrated the ability to manage complex sourcing and negotiations, and bring solid commercial judgment with experience in risk allocation and contract structuring.

Moreover, you have demonstrated experience in large, complex renewable energy or infrastructure projects, preferably in an international context.

We look for the following in the candidate:

- Extensive experience with FIDIC contracts, EPC contracts, supply agreements, service agreements, and NDAs.
- Commercial judgment and risk-based decision-making
- Experienced in negotiating complex commercial and project contracts.
- Experience in claims handling and contract management.
- Ability to work effectively in a changing, partially defined environment

The process

Please apply online as soon as possible as applications will be processed on an ongoing basis. For questions related to the role, please reach out to our Talent Acquisition team at recruitment@cipfs.com. We do not include CV's and Cover Letters sent by email.

As we continue to improve our candidate experience, diversity and avoid unconscious bias, please avoid having a photo in your CV. We commit to an inclusive recruitment process and equality for all applicants.

Please be aware that we will not accept speculative CV submissions for any of our roles from recruitment agencies, and any unsolicited candidate submissions will be exempt from any payment expectations and ownership.

CIP Terra Technologies' commitment to diversity and inclusion

CIP Terra Technologies is committed to securing a diverse and inclusive work environment where everyone feels respected and heard.

A diverse workforce allows CIP Terra Technologies to achieve results through different approaches and solutions to task execution and problem solving. We want all our employees to have equal opportunities for personal growth and career opportunities regardless of age, gender, sexual orientation, disability, religion, nationality, and ethnicity.

About CIP Terra Technologies

CIP Terra Technologies is a project delivery company working for CIP. CIP Terra Technologies is majority owned by the funds managed by CIP, with the purpose of delivering best-in-class project development and execution services to the growing portfolio of land-based renewable energy assets.

We engage in the energy transition through specialist project delivery, value creation, and collaboration with trusted third-party suppliers. Our core focus is the development, procurement, construction, and delivery of renewable energy projects, and we provide a variety of services including technical development, engineering, supply chain, construction management, and project execution.

We provide global support and a local presence in our key markets, and our teams are continuously delivering and refining services tailored to a wide range of technologies – from onshore wind, solar PV and battery energy storage systems, to bioenergy, thermal and transmission infrastructure. For more information, please visit CIP Terra Technologies.

Optimized CIP Platform

Earlier this year, we introduced an optimized CIP Platform. With three platform companies providing services to CIP—and while maintaining our current relationship with Copenhagen Offshore Partners (COP), CIP's exclusive offshore wind development partner—we have effectively strengthened our organizational and operational capabilities, creating a platform scaled for growth and designing the CIP blueprint for the future.

We have established CIP Molecule Technologies, a tech-focused project delivery company dedicated to molecule projects; CIP Terra Technologies, a tech-focused project delivery company managing a diverse portfolio of onshore projects; and CIP Fund Solutions, a delivery company with expertise in complex fund management and investment services. For more info on this, please see: Optimized CIP Platform.
