

Senior Business Intelligence Analyst for Governance & Reporting

Help bring clarity to risk decisions and shape how risk information reaches senior leaders across Danske Bank. As part of our Governance & Reporting team, your analytical skills will contribute directly to protecting customers, products, and processes across multiple business units. Do you enjoy using data to make that kind of difference?

What you will be doing

You will join a team of professionals spread across Denmark, Sweden, Finland, and Poland, all working to deliver meaningful risk management information and reporting. The team is part of Business Risk Transformation within the Business Controls & Product Management function, acting as the first line risk function for Personal Customers, Business Customers, and Large Corporates & Institutions. Collaboration is at the heart of how the team works, with daily interactions across borders and a shared belief that work should be engaging and rewarding.

Your key responsibilities will include:

- Running monthly reporting to support the ongoing risk management journey
- Maintaining and continuously improving existing MI and reporting solutions
- Building out reporting for Financial Risk Testing and other areas
- Extracting, developing, and automating data sources for various projects
- Developing analysis to identify trends and translate them into actionable insights
- Using AI as an integrated part of day-to-day analytical work to streamline reporting, explore data, and develop insights. Applying critical judgement and validating AI outputs.

About you

- Solid experience with data visualisation in Tableau or similar tools
- Experience with Alteryx for data extraction, transformation, and loading
- Ability to build queries in MS SQL, with governance skills as a bonus
- Structured and pragmatic approach to managing multiple stakeholder interactions
- Skilled at looking beyond numbers to identify the underlying drivers of trends
- A careful approach to reporting quality, with the ability to check data and findings, and apply critical judgement,
- Clear and confident communicator, able to convey complex findings simply
- A growth mindset: a willingness to experiment, learn from feedback, and share knowledge with colleagues. Curiosity about AI and new ways of working.

Knowledge of operational risk management or Enterprise Risk Management is beneficial. Familiarity with first line risk frameworks or experience in a financial services environment is also beneficial, with plenty of opportunity to apply that background in this role.

What we offer you

Develop your skills across both technical and business dimensions through a varied role spanning monthly reporting cycles and analytical projects. You will join a team that values close collaboration, shared learning, and a genuine enjoyment of work. You will be based at our Copenhagen office, with the opportunity to work from home one to two days per week.

Are you ready for the next step?

If this sounds like the right opportunity for you, we encourage you to apply. Have questions before applying? You are welcome to contact hiring manager Michael Anker Kristensen at mkri@danskebank.dk.

We review applications on an ongoing basis, so we encourage you to apply as soon as possible or by 10 December 2026 at the latest.

We look forward to hearing from you!
