

Senior Data Analyst, Analytics & Insights

The banking industry is rapidly evolving, and Danske Bank is leading this transformation. Join a major bank in the region and contribute to our commercial agenda. If you are an experienced Data Analyst with strong technical expertise, ready to leverage your skills, we have a great opportunity for you!

About the role

As a Senior Data Analyst you will be part of the Commercial Excellence Team within Danske Bank's Business Customer unit as part of the Nordic Analytic and Insights Team. In this role you will be part of delivering commercial data driven initiatives that stretch across all Nordic countries, having close dialogue with stakeholders on all levels of the bank's [Business Customers unit, a unit that serves +200 000 small and mid-sized corporates across market areas.](#)

You can expect to solve complex problems, support decision-makers with data-driven recommendations, and become a trusted advisor for key stakeholders. You will work with senior leadership yet be comfortable in working effectively at all levels of large organisations. You will also need the ability to balance a holistic view with attention to detail.

Qualifications and Requirements

You have a curious mindset to challenge status quo and bring enthusiasm to the team with a can-do attitude. As a Data Analyst your main responsibilities will be:

- Contribute to identifying and designing commercial activities
- Identify leads for aligned activities
- Provide business cases for commercial activities

- Strategic analysis that supports our Forward 28 Strategy and commercial agenda
- Reporting, tracking and proactive analytics
- Ad hoc data requests

You are required to have:

- Proficiency in English, with strong language and writing skills.
- Proficiency in Python and SQL.
- A commercial mindset with solid analytical skills and a structured, data-driven approach.
- Strong communication skills.

It's also nice if you have:

- Experience in the Banking industry.
- B2B understanding.
- Experience working in an agile set-up with remote team members.

The ideal candidate possesses experience from specialised data teams, ideally within the financial industry, complemented by a technical background and demonstrated ability to translate complex analytics into clear, actionable insights. While not essential, having a keen interest in AI, frontrunner in implementing Danske Bank AI solutions and identifying business opportunities would be advantageous.

What we offer

We offer a dynamic and supportive work environment where you can thrive both personally and professionally. You'll be part of a team of motivated and sociable colleagues who are committed to what they do, making for a fun and engaging workplace. We believe in empowering our employees by providing autonomy in their roles, allowing you to take initiative and make meaningful contributions. Additionally, we are committed to support a culture of continuous learning and development, ensuring you have the resources and opportunities to grow your career.
