

Product Owner – Equities Analytics Squad

Own the product vision for our AI agentic productivity platform, where artificial intelligence meets banking innovation. You will determine what gets built, in what sequence, and how success is measured, translating banker needs into coherent product strategy. This high-visibility role at the intersection of AI, banking, and product development will directly shape how hundreds of bankers interact with AI in their daily work.

At Markets Business Technology (MBT), we're a dynamic team of 200+ professionals at Danske Bank LC&I, united by a focus on innovation in financial markets. Our mission is to build digital solutions and deliver data that empower seamless market transactions for our clients. We work closely with the Markets business, supporting strategic initiatives across capital markets products.

Our team brings together experts from diverse backgrounds - including Quants, developers and Analysts - organized to ensure we manage products from idea to delivery. We believe in a holistic approach: connecting people, technology, and business priorities to create real value. If you're looking for an inclusive, collaborative, and forward-thinking environment where your work contributes to the growth of capital markets, MBT is the place for you.

What You Will Be Doing

You will lead the product strategy for the bank's enterprise AI agentic platform, a strategic initiative enhancing markets using large language models orchestrated via AWS Bedrock and AWS Agent Core. Working closely with Markets Business Technology's diverse team of quants, developers, and analysts, you will bridge business priorities with technical capabilities to create real value across capital markets products.

- Define and maintain the product roadmap for the AI Markets Agentic platform, prioritizing use cases by commercial impact and strategic alignment with market-wide AI ambition

- Conduct continuous product discovery with stakeholders to uncover productivity pain points and validate hypotheses
- Write clear Product Requirements Documents and user stories for AI agent use cases
- Own the product metrics framework, defining KPIs including time saved and active adoption rates
- Drive quarterly business reviews, presenting platform progress and commercial ROI with analytical rigour
- Manage the product backlog in collaboration with engineering leads, making trade-off decisions transparently
- Lead cross-functional coordination across Platform Engineering, AI Engineering, Data Engineering, Security, and Compliance
- Develop and execute change management strategies to maximise banker uptake across geographies

About You

- Proven experience with Equities business is mandatory.
- Understanding the Markets area and the financial industry is mandatory.
- 7+ years in product management with 2+ years on AI, data, or developer tooling products
- Track record of shipping complex technical products in regulated enterprise environments
- Strong analytical skills including usage data and A/B test design
- Stakeholder management skills to influence C-suite bankers and engineering leads simultaneously
- Technical literacy to evaluate build-vs-buy decisions and engage credibly with engineers
- Financial services experience or deep enterprise SaaS product management background

Generative AI product experience with LLM copilots or agentic workflow products would be valuable, along with awareness of model risk management and AI governance in banking.

What We Offer You

You will join Markets Business Technology, a team of 200+ professionals united by innovation in financial markets. We offer flexible working arrangements that support your work-life balance, alongside continuous learning opportunities and career progression. You will work in an inclusive, collaborative environment where diverse backgrounds come together to create meaningful solutions for capital markets.

Are you ready for the next step?

If you are ready to shape the future of AI in banking and own product outcomes that matter, we want to hear from you. For questions about this role, contact Honi Jain at hoja@danskebank.dk. Please submit your application by the 31st of August 2026. We look forward to hearing from you!
