

Analyst (Student Assistant), IR&BD Client Solutions

Do you want to join a global leader in renewable energy infrastructure investment? Then Copenhagen Infrastructure Partners (CIP) is the perfect place for you. We are currently looking for Analysts to join our Solutions team in the Investor Relations & Business Development department at CIP's HQ in Copenhagen.

Team

The Investor Relations & Business Development (IR & BD) team is responsible for all investor-facing activities and business development – from product and fund design to fundraising, onboarding, and servicing investors. The team is international and diverse, comprising about 75 professionals from backgrounds such as investment banking, management consulting, and law, based in nine offices across Europe, North America, Asia, and Australia.

The Solutions team works closely with Business Development in designing, structuring and funding innovative bespoke investment solutions for CIP's clients and prospects. The team is focused on engaging with large and sophisticated investors who require investment solutions beyond traditional closed-ended fund commitments. These solutions include separately managed accounts, carve-outs, levered structures and multi-strategy vehicles. The team also works closely with the CIP balance sheet to coordinate allocation of GP capital to new investment solutions.

Role

In the Solutions team, your key work areas will include:

- Analyzing potential investment structures to create innovative solutions for CIP investors and prospects
- Creating client-facing and internal material on specific solutions and the fundraising progress related to these solutions

- Work with regional Capital Formation (fundraising) teams on the needs related to investment solutions for their region
- Manage processes that span across CIP teams, including Business Development and the CIP balance sheet team, to deliver solutions that require a cross-functional coordination

The position is part-time and based in our headquarters in NordØ. The workload will vary depending on the number of projects you are working on, and you will be given the opportunity to shape your daily routine and schedule.

You

We generally expect that you are in your last semester of your Bachelor or first semester of your Masters, studying Economics, Business, Finance / Economics, Mathematics, Actuarial Mathematics, Law, or any other relevant field. High potential candidates who are earlier in their studies or come from other academic fields may be considered. Key is that you are willing to learn, have an interest in the energy market, private equity and investor space, and have solid PowerPoint and Excel skills. We value high and positive energy, good work ethic and a curious self-motivated mindset.

We look for a candidate who:

- Has a solid numerical understanding and enjoys working with creative and complex analytical challenges
- Has an analytical and structured approach to make clear recommendations from research
- Delivers high-quality output with attention to details, shows self-motivation and willingness to learn
- Thrives in a dynamic environment with ability to work independently and within tight timelines
- Good communication skills, with the ability to adjust to new ways of working with many different stakeholders
- Proficiency in PowerPoint and Excel, and ability to present analysis and solutions to complex problems in a precise manner
- Advanced English communication skills, both written and spoken
- High academic performance and interest in strategy, project management, and renewable energy.
- Relevant work experience from a fund manager, consultancy, law firm (related to M&A or fund formation), private equity firm or banking, or a role in strategy / financing / business development in a corporation is beneficial

Please note that we do not offer a remote working opportunity, thus you must be a Danish resident or an upcoming student enrolled in a Danish university to be eligible for this role. Students on exchange in Denmark are not considered eligible for this position.

The process

Please apply online as soon as possible as applications will be processed on an ongoing basis. For questions related to the role, please reach out to our Talent Acquisition team at recruitment@cipfs.com. We do not include CV's and Cover Letters sent by email.

As we continue to improve our candidate experience, diversity and avoid unconscious bias, please avoid having a photo in your CV. We commit to an inclusive recruitment process and equality for all applicants.

Please be aware that we will not accept speculative CV submissions for any of our roles from recruitment agencies, and any unsolicited candidate submissions will be exempt from any payment expectations and ownership.

Building value that matters

Founded in 2012, Copenhagen Infrastructure Partners P/S (CIP) today is the world's largest dedicated fund manager within greenfield renewable energy investments and a global leader in offshore wind. To date, CIP has developed and constructed more than +50 greenfield renewable projects around the world. CIP is developing a greenfield project portfolio of ~160GW total, and ~16 GW is in operation or under construction. CIP manages 13 funds and has to date raised approximately EUR ~35 billion for investments in energy and associated infrastructure from more than ~200 international institutional investors.

CIP has a multinational team of ~500 full-time employees with extensive experience and knowledge within the fields of renewable energy project development and regulated infrastructure. In addition, CIP has a broad range of competencies within corporate finance, mergers & acquisitions, engineering, construction, project development, and project management.

CIP has built a prominent investment team capable of originating proprietary investment opportunities and executing projects and investments based on the team's industrial background, large industrial network, and extensive experience in structuring, executing, and managing investments within energy infrastructure. Headquartered in Copenhagen, CIP also operates from key locations across the globe, including offices in Hamburg, Munich, London, Utrecht, New York, Tokyo, Melbourne, Luxembourg, Kuala Lumpur, Seoul and Singapore. In addition, CIP has 17 local project offices globally.
