

Ambitious Software Engineering Interns

Do you have a strong desire to test your skills in an inspiring company that provides some of the most innovative digital financial solutions on the market? Are you hard-working, eager to learn and a team player?

An opportunity to take part in the entire software development process

We are looking for skilled software engineering interns for Danske Bank's Development Center in the center of Aarhus. We offer a dynamic and international software engineering environment with more than 300 IT employees who have developed well-known products such as Netbank, Mobilbank, Månedsinvestering and District the Corporates' version of Netbank.

As an intern, you will get different exciting and challenging assignments. You will join a squad and be involved in the development process end-to-end, including everything from specifying requirements and discussing solutions to developing, testing and releasing. Depending on the squad you become part of, you will have the opportunity to work on assignments ranging from front-end development to back-end development and integrations.

At Danske Bank, we work with a wide range of both front-end and back-end technologies and agile working methods, such as Scrum, test-driven development, domain driven design and more.

The different cutting edge technologies and methodologies you can encounter include among others:

- C#, Java, Javascript, Typescript, HTML, CSS, F#, Terraform, Python, PowerShell
- .NET, Spring Boot, Angular, React, GraphQL, Node.js
- RabbitMQ, Kafka, WebSphere MQ
- Containers, Docker, OpenShift, Kubernetes
- MSSQL, Elasticsearch, DB2, Cassandra, Redis

- Microservice architecture, Message oriented middleware, Continuous Integration/Continuous Delivery, Git, REST API's, gRPC
- Domain driven design, CQRS, Event sourcing

Curious and proactive software developer

If you are curious, and you enjoy new challenges as well as learning about new technologies and new development methods you will fit in well with us. You have to be dedicated and proactive and you should also have a positive approach to your assignments and independently provide suggestions for solutions. We are looking for a team player to take part in knowledge-sharing and sparring. What we are looking for in you as intern is the following qualifications:

- Good analytical and problem-solving skills
- Self-starter with great collaboration skills
- Good communication skills
- Proficiency in verbal and written English, as group language is English

We are open to candidates who comes from a variety of backgrounds and are interested in the overall skillset you bring to the table.

Kickstart your future now!

As an intern, you will be able to take the first steps in your future career. We have a young environment with student workers and recent graduates alongside very experienced team members.

The internship will last 20 weeks from February 2027 to August 2027 and must be part of your education plan. You will be employed on a full-time basis. This position will be based in Aarhus and requires a minimum of 37 hours work a week.

After Internship there will be possibilities for continuing in Danske Bank as student. This will be evaluated in the end of the internship between you and your team leader.

Interested?

We hire on an ongoing basis, so send your application, CV and grades as soon as possible. We look forward to hearing from you. If you have any questions regarding the position, please do not hesitate to contact us at ITstudent@danskebank.dk
